

MANUFACTURING

S&H has an efficient and reliable manufacturing and raw material suppliers network, both within Australia and overseas providing us with flexible production capacity to meet the diverse needs of our customers and access to the latest developments and innovations.

DELIVERY

S&H have a proven, nation-wide track record in providing timely and efficient design, manufacture and distribution of uniforms and protective clothing.

TOTAL APPAREL MANAGEMENT (TAM)

This convenient one-stop-shop structure provides for a centralised point of contact for all customer queries, rapid responsiveness, integration in purchasing/invoice processing and streamlined distribution of uniform items.

ONLINE ORDERING

S&H's secure online ordering catalogue allows approved customers to purchase their requirements efficiently 24 hours a day, 7 days a week. The catalogue allows for entitlement management for items supplied and an order approval process where required. Ordering through the catalogue is significantly faster than a paper-based system and the ability to view order progress tracking and historical purchasing data make purchasing management a much more streamlined process.

ABOUT S&H

Stewart & Heaton Clothing Company Pty Ltd (S&H) is an Australian family owned business founded in 1991. Based in Perth, Western Australia and with offices nationally, S&H have two principal areas of operation, being:-

We provide functional, high quality, innovative and cost effective products coupled with customer focused service. Our customers in government and industry are seeking innovation, efficiency, reliability, responsiveness and cost effectiveness in their supply chain for uniforms and personal protective clothing.

QUALITY

S&H is a Quality Endorsed Company accredited to ISO 9001:2008 with SAI Global. Our quality system effectively governs the way in which S&H operates nationally, ensuring consistency with an emphasis on continual improvement.

DESIGN & INNOVATION

To continue to remain protected and functional in highly demanding and hazardous environments, emergency services personnel require high performance levels of their protective clothing and equipment. S&H's commitment to research and development provides our customers with the latest design enhancements, innovative solutions to changing needs, industry standard compliance and raw materials advances in the emergency services sector.

MADE TO ORDER GARMENTS

Specialised garments can be designed and manufactured to meet particular needs. Our expert personnel can identify how to most efficiently produce the garment which best meets these needs.

Made-to-order garments can be customised in terms of:

- design and features
- fabric(s) used
- colour(s) of the fabric's used
- corporate identity, badges and embroidery
- reflective lettering and logos
- visibility requirements
- anti-static needs
- specific environmental hazards (such as electrical arc fault, molten metals, flammable vapours, etc)

STRUCTURAL FIRE FIGHTING

S&H provides purpose-selected material combinations within the multi-layered assembly with garments designed to allow ease of movement and comfort while ensuring high performance protection. All garments are independently certified to the AS/NZS 4967:2009 (Amdt1-2010) Standard.

WILDLAND FIRE FIGHTING

S&H are at the cutting edge for design and manufacture of custom-designed wildland fire fighting garments designed protect without overheating the wearer. All garments are independently certified to the AS/NZS 4824:2006 Standard.

STATION-WEAR & UNIFORMS

S&H provides easily identifiable, presentable and functional "easy-care" garments for emergency services personnel. A variety of design and raw material elements are combined to fully meet particular performance needs.

RESCUE & CIVIL EMERGENCY RESPONSE

A specialist response demands a specialist application garment. S&H provides garments specifically designed for maximum wearer functionality. Garments can be tailored to general emergency response applications as well as more specialised operations.

ACCESSORIES

S&H provides a full range of accessory items to compliment our high-performance garments and all selected to interface appropriately them.

PROTEX®

Protex® is an S&H brand of garments quality endorsed to ISO 9001. It includes a stock-supported range of off-the-shelf fire fighting, emergency services and flame retardant clothing. Additional customisation options are available on a made-to-order basis (minimum quantities may apply).

All Protex® garments are designed and manufactured to significantly reduce injury and save lives.
